

# Trimensions Metaverse Development

[www.trimensions.org](http://www.trimensions.org)

Year of Incorporation: 2007

Category of Innovation: Startup

**Company overview:** Specialists in Web3D, Immersive virtual environments, Educational systems research and development and Second Life Development,

**Innovation:** Initially, the company had restricted its virtual development and research to Second Life. As of March 2008 however, it has shifted emphasis to Java-based Web-browser native virtual environments and is possibly the only company experimenting with virtual education on this platform and paradigm. As a pioneer in browser-based virtual environments for training and education, Trimensions is achieving results and breakthrough on a regular basis.

## Impact of Innovation

**External:** Trimensions has generated a fair amount of excitement among the people it has discussed the application with. These include colleges and institutions like NID (Ahmedabad), Srishti College of Art (Bangalore), as well as a number of smaller private institutions. The potential impact of the innovation is huge, though there has not been much movement in this field in India owing to bandwidth and hardware constraints.
